Summary

Systems Engineer graduated in 2020, with more than 5 years of experience in developing web and mobile applications, mainly using the **MERN** stack along with **React Native**, working as a Full Stack developer. I have worked on the creation and deployment of internal systems, ERPs and e-commerce platforms, integrating external services and optimizing processes as projects grow. I like to work on practical, clear solutions aimed at a good user experience.

Experience

Full Stack Developer, I See You Technologies – CDMX / Tijuana   July 2020 – present

Role focused on the development and maintenance of customized solutions for clients, continuously participating in projects from early stages to production.

- Development of web and mobile applications using **React**, **Node.js**, Express, **React Native** and **MongoDB**.
- Collaborative work with the team to implement scalable solutions.
- Continuous improvement of existing functionalities as the needs of the system grew.
- Direct collaboration with clients to understand needs and propose technical solutions.
- Deployment and maintenance of services in productive environments. CI/CD

Education

Instituto Tecnológico de Tijuana — Tijuana, México   Aug 2015 – June 2020

Computer Systems Engineering

- Strong background in programming, data structures, algorithms and software development methods

Skills

Frontend: React, **JavaScript** (ES6+), **TypeScript**, HTML5, CSS3, Tailwind, Vite

Backend: Node.js, Express, REST APIs, integración de APIs externas, WebSockets, Python

Databases: MongoDB, PostgreSQL

DevOps / Cloud: Git/GitHub, Docker, **AWS** (EC2, S3, Route 53), Apache/Nginx, PM2

Good practices: Clean code, modularity, separation of responsibilities, optimization, agile work (Scrum)

Languages

Spanish: Native

English: Intermediate (B2)
